## SUMMARY

- Senior React Native Engineer specializing in scalable mobile architecture, real-time systems, and cross-platform development (iOS & Android)
- Experienced in building production-grade apps using React Native, Next.js, Firebase, Supabase, and native module integrations
- Skilled in developing modern web applications with Next.js, including SSR, API routes, authentication, and performance optimization
- Strong focus on performance optimization, clean architecture, and rapid product delivery in agile environments

## EXPERIENCE

### Zenkoders

Jun 2023 – May 2026

#### Senior React Native Developer

Karachi, Pakistan

- Owned mobile architecture and end-to-end delivery of scalable React Native applications (iOS & Android)
- Built production-grade apps with modular architecture, improving maintainability and development velocity (React Native, TypeScript)
- Implemented monetization features using In-App Purchases and AdMob integration, contributing directly to application revenue generation
- Contributed to the foundation of the company's internal React Native boilerplate with reusable folder structure, components, and configurations, reducing new project initialization and setup time by nearly 60%
- Designed and implemented real-time communication systems using Agora SDK with custom native modules
- Developed Android native widgets and bridged them with React Native for dynamic user engagement
- Built and optimized backend systems using Firebase Cloud Functions and scheduled automation (Cron Jobs)
- Developed serverless APIs and business logic using Supabase (Edge Functions, RPC, RLS)
- Implemented real-time chat systems using sockets with low-latency communication design
- Improved app performance using optimized state management and caching strategies (React Query, RTK Query, MMKV)
- Built scalable global state architecture using Zustand and custom hooks
- Integrated secure authentication flows (Google, Apple, Facebook)
- Managed full release lifecycle including App Store and Google Play deployments
- Mentored junior developers through code reviews, architecture guidance, and debugging support
- Worked in agile environments with rapid prototyping and iterative product delivery

### WISECH Technologies Pvt Ltd

Oct 2022 – May 2023

#### React Native Developer

Karachi, Pakistan

- Developed and maintained production mobile applications using React Native
- Integrated REST APIs and optimized data flow for performance and scalability
- Implemented state management using Zustand for complex application flows

- Collaborated in agile teams for feature delivery and sprint execution

## SAS Solutions

### React Native Developer

Jun 2022 – Oct 2022

Karachi, Pakistan

- Built and deployed cross-platform mobile applications for iOS and Android
- Integrated payment gateways including Stripe, Razorpay, and Paystack
- Implemented push notification systems using OneSignal for engagement
- Developed multilingual applications supporting RTL and LTR layouts
- Integrated social authentication systems (Apple, Google, Facebook)
- Improved app stability through debugging and performance optimization
- Managed version control and collaboration using GitHub

## SAS Solutions

### React Native Developer Intern

Jan 2022 – Apr 2022

Karachi, Pakistan

- Assisted in development of React Native applications and feature implementation
- Worked on API integration, debugging, and UI improvements
- Gained experience in mobile architecture and deployment workflows

## EDUCATION

---

### Bahria University

#### Bachelor of Science in Computer Science

Aug 2017 – August 2021

Karachi, Pakistan

- Coursework: Data Structures, Algorithms, Databases, Software Engineering, Computer Systems

## TECHNICAL SKILLS

---

**Mobile Development:** React Native (iOS & Android), Native Modules, App Store Deployment

**Languages:** JavaScript, TypeScript, SQL

**State Management:** Zustand, Redux Toolkit, React Query, RTK Query

**Backend & Cloud:** Firebase (Cloud Functions, Firestore, Auth), Supabase (Edge Functions, RPC, RLS), NestJS (REST APIs)

**Real-Time & Performance:** Agora SDK, Socket Programming, MMKV, Caching Optimization

**Web:** Next.js

**Practices:** System Design, Rapid Prototyping, Agile Development, AI-assisted Development

**Tools:** GitHub, Jira, Trello, Figma, Notion
